

Subject: Next Wednesday's (July 20) FISO telecon colloquium: "Artificial Gravity, the ISS, and a Solution to Long-Duration Space Flight"

Date: Fri, 15 Jul 2011 10:38:25 -0500

From: Thronson, Harley A. (GSFC-6600) <harley.a.thronson@nasa.gov>

Folks,

The next Future In-Space Operations (FISO) colloquium will be Wednesday, July 20, at 3pm ET, when Laurence Young will speak on "**Artificial Gravity, the ISS, and a Solution to Long-Duration Space Flight**"

As always, we will use our regular FISO telecon number:

The presentation charts will be loaded on the University of Texas server by noon on the day of the colloquium and accessible at <http://spirit.as.utexas.edu/~fiso/telecon.htm> , which is also our archives of past presentations.

And please note that we are now audio-recording the colloquia and archiving the recordings with the presentation materials.

Have a good weekend,

Harley

Associate Director for Advanced Concepts & Planning
Astrophysics Science Division
Science and Exploration Directorate
NASA Goddard Space Flight Center

Laurence R. Young , Professor
Department of Aeronautics and Astronautics
Massachusetts Institute of Technology
